

# AURELIE PETREL REPETITION

## 09.06.20-09.08.16

The first solo show in Japan of French born artist Aurélie Pétrél (1980), presents a whole new corpus of photographs in the context of two different architectural buildings and locations in Kyoto, and at the same time : a 1975 private house on a residential hill (Supert Window Projec™ & Gallery) and an industrial building in the city (Muzz Program Space). Inspired by the theories of french philosophers Gilles Deleuze and Clément Rosset, the artist creates photographic installations to experiment reality, space and perception by inviting the viewers to enter the image itself.
